## OUR 2023 THEME ~ BEFRIENDING PLUTO IN AQUARIUS

Between March and June of 2023, we get our first taste of Pluto in Aquarius. Pluto hovers on the cusp of Capricorn and Aquarius for the next two years, then conclusively dives into Aquarius for the next 20 years. The French, American and Industrial revolutions coincided with Pluto's last transit through Aquarius. With this current transit, uprisings of groups and communities against entrenched power structures are also likely to erupt volcanically.

However, Aquarius is a universal sign, and in 2023 we focus directly on the positive potential of Pluto's loving heart. The symbol of the water bearer pouring cosmic radiance down from the stars could unite rather than divide us on our pathway towards more equitable global distribution and sharing of resources. In our 2023 theme of Befriending Pluto in Aquarius we suggest how each sign might respond to the radically changing times ahead by finding a silver lining and acting positively with Pluto's drive for individual and community empowerment.
